TECHNICAL RIDER

ACT: DELINUS 03, the smallest taxibus ever !

Technical data
- Dimensions: (LxWxH) 220x105x110 cm.
- Drive: petrol 4-stroke engine.
- Weight: 303 kg. empty weight.

Duration of the show
- 3 x 45 minutes within 4 hours.

Conditions for the playground
- Delinus-03 requires a relatively flat surface.

Requirements backstage when not performing
- When not performing, Delinus-03 must be able to be parked in a guarded area of at least 2x3 meters.
- If we perform for multiple days, a 220-volt power point must be present to allow the battery to be charged during the pause or during the night.
- A dressing room with two chairs, a table, a mirror and running water.

Parking permit, parking space for transport bus/car/trailer
- Parking space near the location of the performance.
- Any parking costs are for account of the organization.

Catering
- During the presence of Delinus (1-2 people) we expect tea, coffee or soft drinks and small snacks for the artists.
- If the performance takes place during the afternoon or evening around dinner time, we expect a decent meal for the artists.

Overnight stay (if necessary)
- 1 or 2 single rooms in a clean and decent accommodation with accompanying meals for the artists.
- Guarded parking.
